

TACHOGRAPHS: MTCO 1324

MOTOMETER

powered by solutions

The MOTOMETER EC tachograph MTCO 1324 sets standards in performance, technology and design thanks to its modular structure with a separate display and registration.

Driver-specific driving, working and resting times are recorded secure against manipulation on the familiar disc, along with the speed and distance (optionally: engine speed and auxiliary additional chart recorder). The date, time, distance, events and service and diagnosis data can be called up via the LCD display.

Apart from new units MTCO 1324, we keep in stock a large number of original MOTOMETER replacement units – naturally with 24 months warranty – from our factory-authorized repair centre.

Our staff are expertly trained at the factory and are authorised to carry out the highest-quality repairs.
